REASONS FOR ALLOWANCE

1. Claims 15-19 and 25-29 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a thin film transistor device comprising a combination of various elements as claimed, more specifically, a drain electrode formed at least in part on the semiconductor layer, a passivation layer formed on the data line and the drain electrode and having a first contact hole exposing the drain electrode at least in part and a portion of an upper surface of the gate insulating layer, a pixel electrode formed on the passivation layer and contacting the drain electrode and the exposed portion of the gate insulating layer through the first contact hole.

Akamatsu ('730) discloses a thin film transistor device comprising a drain electrode formed at least in part on the semiconductor layer, a passivation layer formed on the data line and the drain electrode and having a contact hole exposing the drain electrode and the gate insulating layer, a pixel electrode contacting the drain electrode through the contact hole of the passivation layer. However, Akamatsu fails to disclose a thin film transistor device comprising a combination of various elements as claimed, more specifically, a drain electrode formed at least in part on the semiconductor layer, a passivation layer formed on the data line and the drain electrode and having a first contact hole exposing the drain electrode at least in part and a portion of an upper surface of the gate insulating layer, a pixel electrode formed on the passivation layer and contacting the drain electrode and the exposed portion of the gate insulating layer through the first contact hole. Also, see reasons as set forth in the Appeal Brief filed 08/03/06.
